

Davinci Academy Distance Program

What is the Distance Learning Program?

The distance learning program is an educational branch of the charter school for grades K-6. The distance learning program offers a hybrid design for families who choose to be an integral part of their child's education.

Once enrolled at DaVinci, families gain access to:

Curriculum: Check out curriculum to use for the entire school year, including summer months. We offer a variety of math and language arts programs to choose from.

Laptop: Students can check out a laptop for the entire year.

Epic Day: Students will be able to attend our "Epic Day" one day a week. Epic day is a day of classes such as: Epic Adventure (History Based), Science, Arts and Crafts, Music, Drama, Writing, STEM, and more.

Specials Day: An optional additional day of interest-based classes at our school in Ogden range from cooking to animal encounters.

Education Specialist: A certified teacher is available to guide in curriculum choices, and to assist in any way needed.

Field Trips: DaVinci offers optional field trips at least twice a month on Friday's. Our field trips explore many educational venues all throughout Northern Utah at a discounted rate. The entire family is invited!
